ANNUAL VARIETIES FOR 2020 – updated 9/13/20

KALE 6-packs: \$4.50

Biodiversity Kale

Biodiversity kale is a collection of *five of our favorite kales* that come in a jumbo six pack with one or two each of the following varieties: Russian Frills, Simone Broadleaf, Madeley, Dazzling Blue Lacinato and True Siberian kales.

Descriptions of the varieties in Biodiversity 6-packs follow:

Russian Frills:

A re-introduction of an almost-lost Oregon variety bred by our good friend, plant breeder Tim Peters. The folks at Adaptive Seeds discovered it was being maintained by seedsman Peter Bauwens in Belgium. Similar to Red Russian when young, the purple and red-veined leaves get very frilly as they mature, while remaining exceptionally tender. The dazzling frills upon frills upon frills make this 18–28" kale a great addition to kale bunches or mesclun mixes. We cut this kale into pieces that look much like a purple frisee.

Simone Broadleaf:

Simone Broadleaf is a recent introduction from Adaptive Seeds, a small independent organic seed company in Sweet Home, Oregon. It is characterized by having a diverse selection of very large broadleaf plants of various colors and leaf edge waves. Some plants are dark green and glazed, others are light green and silvery, while still others are tinged with purple or shades of red. This is a particularly yummy and tender variety that is one of the most productive that we have grown. Oregon chef Tim Wastell coined the name to honor all the great Simones out there, from Simone de Beauvoir to Nina Simone.

Madeley:

An extremely vigorous flat leaf heirloom green kale from England which is hardy, tender and sweet. This kale frequently outgrows every other kale we plant in the summer, and out-produces most other kales through the winter as well. Multiple growth tips produce plentiful delicious sprouting kale raab in spring to help fill in for the time when the garden is often producing very little. Related to Thousand Headed kale which we have offered in the past.

Dazzling Blue Lacinato:

Dazzling Blue Lacinato is a recent selection of the classic Lacinato or Dinosaur Kale. It has classic Lacinato blue-green leaves on bright purple stems plus that deep rich sweet flavor. More vigorous than any Lacinato we have grown, this variety is particularly winter and early Spring hardy.

True Siberian:

Large, frilly, blue-green leaves identify this fast growing, exuberant kale. Slow to bolt in summer, it also withstands hard frosts which improve its texture and flavor. 24-30 inches tall.

Besides our Biodiversity 6-packs, we have these kales in full 6-packs:

Shiny Diney

An OAEC Doug Gosling original, selected in our gardens! A beautiful kale with glossy, dark, almost black, strap-shaped leaves which contrast nicely with the blue-green chalky-surfaced leaves of traditional Lacinato or Dinosaur Kale. It is a smaller plant with an even heartier taste.

Dazzling Blue Lacinato or Dinosaur Kale: Dazzling Blue Lacinato is a recent selection of the classic Lacinato or Dinosaur Kale. It has classic Lacinato blue-green leaves on bright purple stems plus that deep rich sweet flavor. More vigorous than any Lacinato we have grown, this variety is particularly winter and early Spring hardy.

True Siberian

Large, frilly, blue-green leaves identify this fast growing, exuberant kale. Slow to bolt in summer, it also withstands hard frosts which improve its texture and flavor. 24-30 inches tall.

Spigariello

This variety is technically a leaf broccoli, but is grown like broccoli raab. Harvest individual leaves for continual harvest or whole plants for blanching. Sweet broccoli/kale flavor from beautiful silvery, feathered leaves. Great fresh in salads or sauteed simply with olive oil, garlic, salt and pepper. Popular in southern Italy.

COLLARDS
6-packs: \$4.50

Yellow Cabbage Collard

One of our all-time favorite collards, this variety is so, so tender and sweet, much like the Variegated Collard. Making its appearance in the late 1880s, Yellow Cabbage Collard seeds have been passed down in the same family in North Carolina for generations. Distinctively, the Yellow Cabbage Collard has rough-edged, non-heading edible chartreuse leaves that radiate from a common stem. It grows year-round in full sun or partial shade and can grow to be 24 inches tall and wide. It has a silky, tender texture, more akin to spinach than bitter greens.

Olde Timey Blue

Donated to Seed Savers Exchange of Decorah, Iowa, in 1989 by Ralph Blackwell of Alabama. Ralph's family grew this variety for over a hundred years and his mother used it to make a dish similar to sauerkraut. Plants grow to 2' tall with unique blue-green leaves with purple stems and pink veins. Very sweet and tender leaves. 60-80 days.

BROCCOLI

6-packs: \$4.50

Early Purple Sprouting

An English heirloom variety, bred for overwintering. Produces *lots* of purple broccoli sprouts in the spring. Grows slowly through the winter into an impressive huge plant. Very frost-hardy. A delicious broccoli that is hard to find in this country.

MUSTARDS: RED & GREEN

6-packs: \$4.50

All of these mustards are fabulous eaten raw in salads, and have a robust spicy taste. They sweeten to a full, rich flavor when sautéed or used as a potherb.

Biodiversity Mustard Mix

Includes at least one of each of the following varieties: Pizzo, Red Feather, Oak Fire, Frizzy Lizzy and Spicy Curls mustards. Individual descriptions follow.

Pizzo

A mild tasting, bright green mustard with very curly frilled leaf margins. Very winter hardy. One of our favorite green mustards for use as saute or an ingredient in salad mix.

Red Feather

An OAEC original, developed by Nursery Manager Doug Gosling, as featured in our 2005 catalogue. A sharply-toothed cross between Old Fashioned Ragged Edge and Red Giant mustard, it has green leaves and striking red venation.

Oak Fire

A mix of gorgeous spicy mustard greens perfect for salad mix. Oak Fire has excellent flavor and a moderate heat and beautiful oakleaf-shaped red and purple leaves. Great for salad or bunching greens. Bred in Oregon by Tim Peters of Peters Seed and Research for more cold hardiness and disease resistance than other red mustards.

Frizzy Lizzy

A fantastic red mustard with a delicate skeletal leaf shape and a deep wine-red color. Excellent as a baby green, it adds a good spicy element, lovely color, and some bulk to salads.

Spicy Curls

A very diverse and strikingly beautiful mix of curly and wavy, mostly red and purple leaves with good moderate heat. Great for salad or bunching greens. A favorite of ours for cooked greens, the heat vanishes once cooked and the deep rich sweet flavor remains. Bred in Oregon by Tim Peters of Peters Seed and Research for more cold hardiness and disease resistance than other mustards.

LETTUCE

6-packs: \$4.25

Pirat

Medium green Butterhead with gently crinkled leaves overlaid with a soft brick red. Tender hearts blanch to a creamy yellow. Reliable and bolt-resistant.

Merlot

Outstanding color of burgundy-red. Loose-leaf type for “cut and come again” use. One of our absolute favorite red leaf varieties.

Reine Des Glaces (Ice Queen)

Slow-bolting variety. Dark green deeply-cut pointed lacy leaves. Medium to dark-green crisp heart and crunchy texture. Very succulent and sweet taste. A favorite of Doug Gosling’s since 1982.

Joker

One of the wildest looking lettuces ever, this crisphead variety produces dense 6-8 inch heads that are crunchy and delicious. The ruffled leaves have an emerald green background festooned with splashes and flecks of burgundy and brimmed with toothy red edges. It is very heat and bolt resistant.

Brown Golding

Also called Goldring’s Bath Cos. Rare heirloom from 1923. Bronze-tipped leaves with surprising brownish-pink tinge. No other lettuce comes in this color! Very sweet and crunchy. In the OAEC collection since 1992.

Chadwick Rodan

Medium-sized Romaine. Crunchy, tender, very sweet and buttery. Compact Bibb-type heads of tender pointed red-bronze leaves with thick succulent midribs. An heirloom from Europe brought to this country by English gardener Alan Chadwick.

Lingue de Canarino (Canary’s Tongue)

Italian heirloom oakleaf variety with full heart and lime-green tasty leaves. Three distinct leaf types fill out this loose, mild-tasting 8-inch rosette. Good in salad mixes. Works very well in the fall or spring. Another OAEC favorite oakleaf, this variety was given to Doug Gosling in 1992 by the Seed Savers Exchange.

Celtuce

Also known as Stem Lettuce, Celery Lettuce, Asparagus Lettuce or Chinese Lettuce, this cultivar of lettuce is grown primarily for its thick stem rather than its leaves. Used as a mild-flavored sauté vegetable, especially popular in China. Also can be sliced and eaten raw as a crunchy addition to salads.

SALAD GREENS

6-packs: \$4.25

Salad-in-a-Six-Pack

This diverse mix of at least 15 salad mustards includes Arugula, Mizuna, Russian Red and Dinosaur Kales, various collards and many red and green Mustards. You can choose to tease these plants apart and plant each one separately or you can plant them in six clumps at 4-6 inches apart. In either case, if you harvest them continuously, you will have small, bite-sized leaves for your salads for several months. A special OAEC blend.

ENDIVE

6-packs: \$4.25

Capellina

The unique, fine, pointy leaves of Capellina growing in dense mounds set it apart from other frisée endives. Much larger and hardier than other frisées. Good flavor raw for salad mixes. Best as a spring, fall or winter harvest as it may get tip burn in the summer heat. All endives benefit from row cover protection in very cold weather. Sometimes referred to as Riccia Fine d'Inverno (Capellina), because it is a re-selection of an older winter endive.

RADICCHIO

6-packs: \$4.50

Rossa di Treviso

An exotic and beautiful radicchio which is shaped like a small upright Romaine lettuce with slender pointed deep burgundy leaves and bright white veins. Large heads mature tightly such that inner leaves can blanch to a pale pink or yellow in color. The superb flavor and crunchy texture of this radicchio's fresh bittersweet zing combines amazingly well with grated hard cheese, vinaigrette and the classic Italian salty anchovy. 'Treviso' refers to the tall elliptic radicchio types originating in Treviso, Italy.

Rossa di Verona

Traditional round variety from the Verona region of Italy. An outstanding selection of a solid heading radicchio with a 4-6" tall, somewhat elongated shape. Deep red/purple leaves with broad white mid-ribs are nice and crunchy with the tangy bitterness that radicchio is known for. Also great harvested young as a loose head or for salad mix as cut-and-come-again greens.

Variegata di Castelfranco

Variegata di Castelfranco is a big heading chicory with lots of bright colors, mostly green with red speckles. If planted in late August or early September, it will head up for winter, or if planted late, it can still be harvested as a loose head. It is hardier than most other radicchio varieties and is a great variety for winter salads or used as a grilled vegetable in risotto.

ESCAROLE

6-packs: \$4.50

Cornet de la Loire

Impressively vigorous and uniform, this escarole is great as a fall and winter vegetable with its firm crunchy and juicy texture and sweet nutty taste with that slight bitterness unique to escarole. When planted in late summer, Cornet de la Loire will head up and make a tight blanched heart which resembles sugarloaf chicory or a stocky romaine lettuce heart. It is beautiful and tastes wonderful both fresh in winter salads and as a grilled vegetable in dishes such as risotto. The Loire River valley is famous not only for its wine production, but also for its escarole!

Diva

A broad-leafed Batavian type endive. Large, loose, green heads are a delicious addition to salad and also good braised or sautéed. Mild even in summer heat, its flavor develops to perfection in the late summer or autumn once nighttime temperatures cool. Diva's broad leaves are sugary sweet with a tiny hint of bitterness; imagine juicy, sweet walnuts. Seed was originally sourced from the German biodynamic seed company, Bingenheimer Saatgut.

Sugarloaf Borca

Tall, green romaine-like "loafs" are sweet and crunchy. Quite hardy here in northern California. We so look forward to sugarloaf salads with their blanched pale green -almost white- leaves and deep mild flavor, particularly delicious mixed with toasted walnuts or pecans and various citrus or pomegranate seeds. We also love to cook it in soups, risotto and polenta or by itself as a grilled vegetable. The Borca selection is known to have a much better consistency and hardness than other sugarloaf varieties. Also known as Pan di Zuccherio in Italy, and Zukerhut in Germany.

SWISS CHARD

6-packs: \$4.50

Bright Lights or Rainbow

Original selection of heirloom varieties from Australia with white, lemon yellow, orange, red and pink colored midribs with green leaves. Very tasty. Cold-tolerant. Incredibly beautiful ornamental food crop.

Canary Yellow

A stunning variety with canary yellow midribs which contrast beautifully with its sea green leaves. Delicious and productive.

FENNEL

6-packs: \$4.50

Perfection

This Northern European variety was developed to mature more quickly in northern climates, so it sizes up earlier than other varieties here. It has large, round bulbs, a fantastic crunchiness and a sweet full fennel flavor, perfect thinly sliced into salads or halved and painted with olive oil, salt and garlic and grilled as a vegetable side dish.

CULINARY HERBS

Chervil

6-packs: \$4.25

Delicate winter herb with anise-parsley flavor. Great as a garnish, an ingredient in soup or salad, or made into a winter pesto. Flowers are tasty too!

Cilantro

6-packs: \$4.25

Does well in cool weather throughout the winter and early spring! Great made into a pesto. Flowers are beautiful and edible. The seeds of cilantro are called coriander. If you haven't tried fresh green coriander in your cooking, you must!

Gigante D'Italia Parsley

3" pots: \$3.00

Very flavorful flat-leaf heirloom parsley which produces a very large, productive, and vigorous plant.

Moss or Triple Curled Parsley

3" pots: \$3.00

The leaves of this parsley are so deeply cut and curled that it resembles moss. Vigorous, high-yielding, uniform, and very sweet. Introduced in the late 1800's.

Smallage

3" pot: \$3.00

The ancestor of celery, sometimes called cutting celery, has been one of the favorite herbs we have offered in recent years. Plants have a parsley-like look and are very ornamental, but have an intense celery flavor. Great for use in seasoning soups and stews.

EDIBLE FLOWERS

Blue Borage

3" pot: \$3.00

The blue-flowered form of Borage (*Borago officinalis*) is a fabulous addition to any garden. This beautiful hardy annual is a vigorous plant which can produce hundreds of azure-blue flowers, especially useful for attracting honeybees and other beneficial insects. Once established and going to seed, it will become a welcome "volunteer" in your garden forever! Borage flowers are one of the best-loved edible flowers, tasting remarkably like cucumber and used raw in salads, herb waters or vinegars, or as a garnish on any sort of dish. The leaves are commonly cooked in Italy; raviolis are stuffed with Borage leaves in Genoa, and elsewhere are served like spinach, or dropped in batter and deep-fried as fritters.

Calendula- Flashback Mix

6-packs: \$4.50

A very elegant calendula. The light pink petals with a touch of yellow on the outermost tips and maroon undersides give these flowers a softer look than the bright orange and yellow hues of most calendula. Bred by preeminent plant wizard and breeder Frank Morton of Wild Garden Seed in Oregon's Willamette Valley. Calendula is one of the finest edible flowers. Use orange or yellow petals in salads or as a garnish for any dish.

Calendula- Erfurter Medicinal

6-packs: \$4.50

Fully double, bright orange flowers on 18-24" plants. Erfurter is a preferred variety for commercial production in the US, with larger flowers and a somewhat higher resin content than the more common Resina. Petals can be used to make a natural dye, or even fed to chickens to keep egg yolks extra vibrant. (This calendula produced in Italy for this specific purpose!) Variety originates in Germany, where its full name is Erfurter Orangefarbigen. Aka, Orange Zinger.

Shungiku

6-packs: \$4.50

Variouly called Garland or Edible Chrysanthemum or Chop Suey herb. Shungiku leaves are a delicious, richly flavored ingredient in salads or can be added as a brightly distinctive addition to sautés. Bright yellow flower petals are edible too! Once you let this beauty go to seed, you will have this useful and tasty plant as a welcome 'volunteer' in your garden forever.
